

Tiered Thinking Questions for Regions (using Bloom's Taxonomy)

Look at these environments. Name as many as
you can.

Choose an environment. Describe 2 animals
that might live there.

Use what you know about Earth's ecosystems.
Organize a list of what they all have.

Study each ecosystem. Contrast 2 that are
the most different.

Imagine an ideal ecosystem. Elaborate on the
land, plants, animals, weather.

If you were asked to live in one of these
places, which would you choose? Why?
