

How to Access Your Child's Lunch Account

- To log onto this system, you can go directly to <http://lunch.wilmette39.org> or follow the links on your school's webpage.
- Your username is your local seven-digit home phone number with no dashes.
- Your password will be the one assigned to your oldest child for online registration
- Families with multiple same age children as the oldest in the district should use the password assigned to the child with the first name closest to A
- If you do not currently have your online registration password information, you may get it **in person** from your school secretary. For security purposes, you must pick up your password in person, we cannot give it out over the phone.
- After logging onto the system, you will be able to see your child's account information and you may enter an email address that will be used to send you account balance reminders.
- If you have more than one child at our district schools, you will be able to login once utilizing the family account feature and make payments for each child.
- Last year's lunch account balance will be transferred to the new system. Your old balance will be reflected on your new account.
- Once the online payment portion is enabled for this school year, you will see a link on your information page to **RevTrak for account deposits**.

Please note that deposits completed online will take up to twenty-four hours to be reflected in your account balance.
